PROFESSIONAL SUMMARY

Final-year Computer Science student (Expected May 2026) and AI/ML Engineer Intern with hands-on experience building LLM pipelines, RAG systems, and Generative AI applications. Proficient in LangChain, OpenAI API, Anthropic API, FastAPI, and vector database integration. Full-stack experience with React and Node.js.

EDUCATION

Bachelor of Engineering, Computer Science Sandip University, Nashik	Aug 2023 – May 2026 (Expected) CGPA: 8.3
Diploma in Computer Science KK Wagh Polytechnic College, MSBTE	2021 – 2023 73.6%
12th Standard (HSC) Arambha Mahavidyalaya, Maharashtra State Board	2020 – 2021 75.67%

TECHNICAL SKILLS

AI / ML	RAG Systems, LLM Integration, NLP, Prompt Engineering, LangChain, Generative AI, Embeddings, Vector Databases, OpenAI API (GPT-4o), Anthropic API, Machine Learning, Pandas, NumPy
Backend	Python, FastAPI, Node.js, REST APIs, Django, JavaScript, Java
Web & Frontend	React, Next.js, MERN Stack, HTML, CSS
Data & Cloud	MongoDB, MySQL, Qdrant (Vector DB), Azure, AWS, Docker
DevOps & Tools	Git, GitHub, CI/CD

EXPERIENCE

AI/ML Engineer Intern Atronz Innovations	Dec 2025 – Present Remote, Bengaluru
- Designed and delivered 5 full-stack AI web applications integrating OpenAI (GPT-4o) and Anthropic (Claude) APIs with React and FastAPI, directly supporting the founding team's client pipeline. - Built LLM pipelines covering prompt engineering, context management, and response validation for structured output. - Owned end-to-end implementation from requirement analysis to production deployment, working directly with the founding team.	
Full Stack Developer Intern Codevocado Pvt. Ltd.	Nov 2024 – Jan 2025 Remote, Uttar Pradesh (Short-term contract)
- Built a data-entry workflow application using React and Node.js, cutting manual processing time by 30%. - Implemented JWT-based authentication and used MongoDB for dynamic multi-user data storage.	
Web Developer Intern Npit Solutions Pvt. Ltd.	Jan 2023 – Mar 2023 Nashik, Maharashtra
- Developed 5 responsive client websites using HTML, CSS, and JavaScript, improving user engagement by 20%. - Reduced page load time by 15% and bug count by 30% through optimisation and cross-browser testing.	

PROJECTS

Secure Document-Chat RAG Application	github.com/abhijitprakashborade/RAG-App
- Built a RAG pipeline for document Q&A using LangChain and OpenAI with source-grounded responses. - Integrated Qdrant vector database for semantic indexing and sub-second retrieval across large document sets. - Designed a privacy-first local processing flow using Gradio - no user data sent to external servers.	
PartyHub - Event Venue Management System	github.com/abhijitprakashborade/PartyHall
- Developed a full-stack booking platform with Django and Next.js supporting dynamic service packages. - Integrated Razorpay API for secure payment processing with automated slot-blocking and SMS reminders.	

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** - Oracle University (2025) — ID: 3227887890CI25GAIOCP
- Google Data Analytics Certificate** - Coursera (2024)
